

Knowledge Management in Public Administration: Critical Success Factors and Recommendations

By Feriz Sejdija

Anchor Academic Publishing Mai 2013, 2013. Taschenbuch. Book Condition: Neu. 220x155x5 mm. Neuware - Modern tax administration in Germany is flooded with information due to its complex environment. This study analyses the knowledge management system of the German tax administration, based on a holistic approach. It considers all influencing dimensions, namely organisational, technological and human dimensions. The major theoretical framework is provided by Nonaka and Takeuchi (1995) and Yang and Maxwell (2011) for the organisational dimension. Moreover, Gable et al. (2008) provide success factors for the information technology. The literature review describes success factors for a successful implementation of a knowledge management system based on cumulated best practices of König (2011), Back et al. (2008), Heinemann et al. (2010). The quantitative research methodology allowed a generalisation and a deduction of the findings to issue specified and grounded recommendations. 76 pp. Englisch.

The publication is simple in go through preferable to fully grasp. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
