A specimen table is given on p. 174 for 300. The lengths of the ordinates of each radial plane are set down in the ordinary way, and operated on by Simpson's multipliers, giving us a function of the area on the immersed side of 550-1, and on the emerged side of 477-4We then put down the squares of the ordinates, and put them through the Simpson's multipliers, giving us a result for the immersed side of 17,888, and for the emerged side 14,250. The remainder of the work on the preliminary table will be described later. We now proceed to the combination table for 30 (see p. 175), there being one table for each angle. The functions of squares of ordinates are put down opposite their respective angles, both for the immersed wedge and the emerged wedge, up to...
