

Signal Transduction in Plants

By Sopory, S. K. / Oelmüller, Ralf

Book Condition: New. Publisher/Verlag: Springer, Berlin | Current Advances | Proceedings of the first ICGB Symposium on Plant Signal Transduction, held 4-6 October, 1999, in New Delhi, India | An understanding of the mechanisms by which plants perceive environmental cues, both physical and chemical, and transduce the signals that influence specific expression of genes, is an area of intensive scientific research. With the completion of the genome sequence of Arabidopsis it is understood now that a larger number of genes encode for proteins involved in signalling cascades and transcription factors. In this volume, different chapters deal with plant receptors, second messengers like calcium ions, phosphoinositides, salicylic acid and nitrous oxide, calcium binding proteins and kinases. In addition to dealing with the response of plants to light, hormones, pathogens, heat, etc. on cellular activity, work currently going on in apoptosis, cell division, and plastid gene expression is also covered in this book. | 1. Differential Perception of Environmental Light by Phytochromes; M. Furuya. 2. Functions and Actions of Arabidopsis phytochromes; K.J. Halliday, et al. 3. Signal Transduction in Photomorphogenesis: Intracellular Partitioning of Factors and Photoreceptors; E. Schäfer, et al. 4. Molecular Genetic Analysis of Constitutively Photomorphogenic Mutants of Arabidopsis; J.P. Khurana, et al. 5. Cytosolic...

Reviews

This ebook will be worth buying. It usually fails to charge too much. You will not sense monotony at any time of your time (that's what catalogs are for regarding when you check with me).

-- **Retha Frami V**

This is the greatest book i have got read through till now. I could possibly comprehend almost everything out of this published e book. Your daily life span will probably be enhance the instant you total looking at this book.
