Reviews

It is simple in go through preferable to comprehend. It is full of wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.
(Leif Predovic)

SEMICONDUCTORS

To download **Semiconductors** PDF, remember to access the hyperlink below and download the document or have access to other information that are in conjunction with SEMICONDUCTORS ebook.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Group IV-Elements and III-V-Compounds | The frequent use of well known critical data handbooks like Beilstein, Gmelin and Landolt Bornstein is impeded by the fact that merely larger libraries - often far away from the scientist's working place - can afford such precious collections. To satisfy an urgent need of many scientists for having at their working place a comprehensive, high quality, but cheap collection of at least the basic data of their field of interest the series "Data in Science and Technology" is started now. This first volume presents the most important data on two groups of semiconductors, the elements of the IVth group of the periodic system and the III-V compounds. All data were compiled from information on about 2500 pages in various volumes of the New Series of Landolt-Bornstein. For each critically chosen data set and each figure the original literature is cited. In addition, tables of content refer to the handbooks the data were drawn from. Thus the presentation of data in this volume is of the same high quality standard as in the original evaluated data collections. We hope to meet the needs of the physical community with the volumes of the series "Data in Science and Technology", forming bridges between the laboratory and additional information sources in the libraries. | Contents: Part A: Introduction: General remarks.- Physical quantities tabulated in this volume.- Part B: Physical data: Elements of the IVth group and the IV-IV compounds: Diamond (C).- Silicon (Si).- Germanium (Ge).- Grey tin (Sn).- Silicon carbide (SiC).- Silicon germanium alloys (Si_xGe_{1-x}).- III-V compounds: Boron nitride (BN).- Boron phosphide (BP).- Boron arsenide (BAs).- Aluminium nitride (AlN).- Aluminium phosphide (AlP).- Aluminium arsenide (AlAs).- Aluminium antimonide (AlSb).- Gallium nitride (GaN).- Gallium phosphide (GaP).- Gallium arsenide (GaAs).- Gallium antimonide (GaSb).- Indium nitride (InN).-...
