Brand New Book ***** Print on Demand *****.Excerpt from The Chemistry of the Radio-Elements, Vol. 1 The Chemistry of the Radio-Elements was first published as a single volume in 1911. Early in 1913 the important generalisation was made which connects the chemical nature of the radio-elements with the sequence of changes in which they result, and which has given rise to the theory of isotopic elements, and thrown a fresh light on the Periodic Law. These discoveries formed the subject of a new volume, published at the end of 1913, as Part II of the Chemistry of the Radio-Elements, the original volume thus becoming Part I. In 1914, a new edition of Part I being called for, the present volume was written. The whole subject can now be presented much more clearly and completely than in 1911, and in consequence Part I has had to be largely rewritten from the new point of view. But whilst the general mode of presentation has been much modified, the ground already covered in detail in Part II has been, as far as possible, avoided in the present volume, which concerns itself rather with the practical consequences than with the theoretical significance of the new generalisations. In addition, much new matter has been added, especially in connection with the a-rays and recent electro-and colloidochemical researches on the radio-elements.
