In this case the same paths of breakdown for the different frequencies are retained, but now if low-frequency breaks down the gaps in series with the high resistance, the entire voltage less that consumed in the arcing gaps is concentrated across the next highest division of gaps. These, if correctly designed, will at once break down, passing the strain still farther up the arrester, and so on, the arrester breaking down in sections until it is either completely broken down or the line voltage 6 o o o o o o o o o o o o o o 9. has been lowered by the current flowing through the resistance. This idea has been worked out in the design of a new line of arresters described below. The Graded Resistance Lightning Arrester During the...
