Brand New Book ***** Print on Demand *****.Philosophers, scientists and Atheists seem to have a tendency toward avoiding God in positing their premises. However, Divine Law should not be excluded from analysis. In actuality, God and the Bible have played more of a role in the education and development of the minds of major thinkers than you might think. In *The Proven God*, Balderston suggests that the Big Bang Theory and other scientific and philosophical conventions are influenced by the Divine, and indicative of the Truth: God is real. Denial of God too often reigns supreme, and for the wrong reasons. Through an exploration of the centuries greatest thinkers, eyes will open to the farce that is a reality without God, who is the cause of all we enjoy, and who provides our enlightenment. In an interesting analysis of a broad range of philosophical viewpoints, Balderston explores those who have converted from being an atheist/non-believer to being Christiana and maintained their logic. The book concludes with advice on how to live with doubt, an issue that is pervasive for the believer and the non-believer alike. Through our own doubts we experience our existence and understand our purpose. Allow this read to awaken you to a new enlightenment and age of reason, a clarification and understanding of modern thinking, and the attributes of the Divine.
