

Artificial Neural Nets and Genetic Algorithms (Ales, France, 1995)

Filesize: 5.47 MB

Reviews

I actually started out reading this book. It can be packed with wisdom and knowledge I discovered this ebook from my dad and i suggested this book to understand.

(Prof. Barney Harris)

ARTIFICIAL NEURAL NETS AND GENETIC ALGORITHMS (ALES, FRANCE, 1995)

To read **Artificial Neural Nets and Genetic Algorithms (Ales, France, 1995)** eBook, make sure you click the link listed below and save the document or have accessibility to additional information which are in conjunction with ARTIFICIAL NEURAL NETS AND GENETIC ALGORITHMS (ALES, FRANCE, 1995) book.

Book Condition: New. Publisher/Verlag: Springer, Wien | Proceedings of the International Conference | Artificial neural networks and genetic algorithms both are areas of research which have their origins in mathematical models constructed in order to gain understanding of important natural processes. By focussing on the process models rather than the processes themselves, significant new computational techniques have evolved which have found application in a large number of diverse fields. This diversity is reflected in the topics which are subjects of the contributions to this volume. There are contributions reporting successful applications of the technology to the solution of industrial/commercial problems. This may well reflect the maturity of the technology, notably in the sense that 'real' users of modelling/prediction techniques are prepared to accept neural networks as a valid paradigm. Theoretical issues also receive attention, notably in connection with the radial basis function neural network. Contributions in the field of genetic algorithms reflect the wide range of current applications, including, for example, portfolio selection, filter design, frequency assignment, tuning of nonlinear PID controllers. These techniques are also used extensively for combinatorial optimisation problems. | Workshop Summary.- Invited Talk.- Kohonen neural networks for machine and process condition monitoring.- Plenary Session.- Process modelling and control with neural networks: present status and future directions.- Session A1: Classification.- A genetic algorithm for multicriteria inventory classification.- Optimizing classifiers for handwritten digits by genetic algorithms.- DCS: A promising classifier system.- Application of neural networks for classification of temperature distribution patterns.- Session B1: Genetic Algorithms and Combinatorial Optimisation.- Combination of genetic algorithms and CLP in the vehicle-fleet scheduling problem.- Minimum cost topology optimisation of the COST 239 European optical network.- Timetabling using genetic algorithms.- Resolution of cartographic layout problem by means of improved genetic algorithms.- Using genetic algorithms to solve the radio link frequency assignment problem.- Session C1: Learning...
